Mentor Report for 2022-23

The PG department of Computer Applications has implemented a comprehensive support system to enhance the learning experience of its students during the academic year 2022-2023. Central to this effort is the Mentor Form, which assigns mentors to students, providing them with personalized guidance and support throughout their academic journey. Additionally, the department conducts Regular Tests specifically tailored for slow learners, enabling educators to identify areas of difficulty and tailor instruction to address individual needs effectively. For those students who require further assistance, Remedial Classes are offered, providing targeted instruction to help them overcome challenges and improve their understanding of course material. Moreover, continuous monitoring through attendance tracking ensures that student progress is closely monitored, allowing educators to promptly intervene and provide additional support whenever necessary. Through these initiatives, the PG department of Computer Applications demonstrates its commitment to fostering a supportive learning environment where all students can thrive and succeed.
