ST. JOSEPH'S COLLEGE OF ARTS & SCIENCE (AUTONOMOUS)
CUDDALORE - 607 001.

CLASSROOM INSTRUCTION TRACKING SYSTEM (CITS)
(Teaching Plan and Pedagogic Methods Input System)

St. Joseph's College of Arts & Science (Autonomous), Cuddalore, utilizes a **Classroom Instruction Tracking System (CITS)** as a **mandatory, structured approach for teachers to follow a detailed Teaching Plan and Pedagogic Methods Input System for each class hour.** The college emphasizes a **multi-modal approach to instruction, combining traditional methods with contemporary techniques.** This system emphasizes a variety of student-centric teaching methodologies designed to enrich learning experiences and enhance engagement through experiential, participative, and problem-solving approaches. **Each hour, teachers record key elements, including Class Handled, Course Code, Course Name, Unit, and chosen teaching methodologies.**

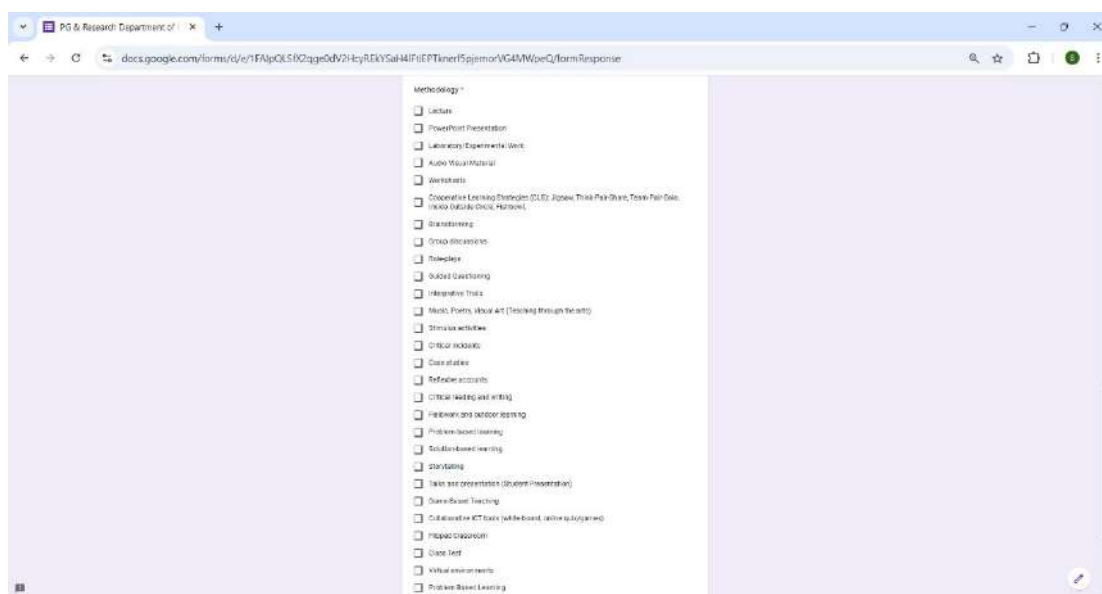

The image shows a screenshot of a Google Forms interface for the CITS system. The form title is "PG & Research Department of English, St. Joseph's College of Arts and Science (Autonomous) Cuddalore - 1." The form is displayed in a browser window. The form content includes a header with the department name and college name, a user identification field for "sarcollega@sjctnc.edu.in", a checkbox for "Record sarcollega@sjctnc.edu.in as the email to be included with my response", and a section titled "Teaching Plan and Pedagogic Methods Input System." which contains the college logo. At the bottom, there is a field for "Employee ID with Name".

Sample Screen Shot of CITS

A wide range of instructional methods are applied, reflecting an adaptable and inclusive approach to pedagogy. **Traditional methods, such as lectures and PowerPoint presentations,** are complemented by **experiential techniques, including laboratory work, interpretive trails, and fieldwork,** which encourage students to engage directly with the subject matter. Additionally, **participative learning activities like group discussions, role-plays, and cooperative learning strategies—such as**

Jigsaw, Think-Pair-Share, Team-Pair-Solo, Inside-Outside Circle, and Fishbowl—foster collaboration and peer-to-peer interaction, making learning more interactive and dynamic.

Creative instructional approaches are also employed to address different learning styles. These include teaching through the arts with **music, poetry, and visual arts, as well as using audio-visual materials and stimulus activities** that capture student interest and inspire critical thinking. Teachers use methods like **guided questioning, brainstorming, and case studies to deepen understanding and enable reflective thinking**, while **reflexive accounts and critical reading/writing exercises encourage self-assessment and the development of higher-order thinking skills.**

Different Types of Classroom Teaching Methodologies Practised / Encouraged

To further **develop problem-solving abilities**, methodologies such as **problem-based learning, solution-based learning, and game-based teaching are integrated, enabling students to tackle real-world issues and apply concepts in practical scenarios.** Teachers also use **ICT-enabled tools** to augment the learning experience, incorporating **virtual environments, collaborative whiteboards, online quizzes, flipped classrooms**, and other digital resources that make learning accessible and interactive.

This systematic approach aligns with the college's commitment to student-centric education, utilizing diverse and innovative pedagogies, enhanced by ICT tools, to make learning more effective and engaging. By employing these varied methodologies, St. Joseph's College fosters a well-rounded, participative, and solution-

oriented learning environment that prepares students to apply their knowledge practically and think critically.

cramer's rule

Inverse of Matrix

Problems based on inverse of matrices.

Evaluation of integrals using Green's theorem

Divergent and curl of a vector point function

Angle between the two surfaces

EXERCISE

Solve the system of equation

COMMET 24

Problem solved on divergence and curl of a vector point function

Matrix Inversion method

Verification of Green's theorem

Verification of Green's theorem, examples.

Curl of a vector point function and some solved problem

Solutions for given equation

Class cancelled

Input and output analysis

Irrotational and Solenoidal

Percentages

Solution of linear system of equations

Solution of a system of linear equations (Cramm's Rule)

Newton 's forward formula

Matrix scalar

To find curl curl of a vector point function

Solving equations

Commercial arithmetic

Newton Method

Gauss divergence theorem, evaluation of integrals using this theorem

Problem on curl, div of a vector point function

Theorem on curl, divergence

Input - output Analysis

Limit, Continuity and discontinuity - Definition, Examples.

Problems on Gauss divergence theorem.

Lagrange Method

Problem solved on curl & Divergence of vector point function

Missing terms

Revised unit 4

Find percentage and decimal values

Verification of Gauss divergence theorem

Solution of linear equation

Divergence and curl of a Vector point function

Problems in limit

Verification of Gauss divergence theorem.

Stoke's theorem, problems

Marginal Revenue

Problems in Marginal Revenue

Verification of Stoke's theorem

Arithmetic series

Find selling price and cost price

Verification of Stoke's theorem.

Cramer's rule

Percentage

Introduction of forward difference, backward difference,E
