## About the Symposium

Intellectual Property (IP) refers to creations of the mind, such as inventions, literary and artistic works, designs, and symbols, names and images used in commerce according to World Intellectual Property Organization. One of the major functions of the patent system is the dissemination of technical information. Patent information is a valuable and comprehensive source of technical, commercial and legal information that can be used directly for scientific and experimental purposes and as a basis for stimulating the adaptation and improvement of the technology described in patent

documents immediately after their publication. The National symposium on "Intellectual Property Rights - Bridging Academia & Industry" is planned to create a platform for the Scholars and Faculties from Academics and Members from Industries to gain knowledge about Intellectual Property Rights and their role in Academic and Industries.
